Dear Sirs,

West Midland Limestone Search
ADDRESS, TOWN, POSTCODE, ETC.

I write with regards to your request for a West Midland Limestone Search over the above property.

Because of concern over disused limestone workings affecting a very small percentage of land and property in the Black County region, the Local Authorities concerned and the Department of the Environment commissioned the West Midlands Limestone 1983 Study (as amended). This report represents the best information presently available on limestone workings in the West Midlands.

We can now confirm further to our enquiries that there is no record of any limestone workings affecting the above property.

Should you require further information or assistance, please do not hesitate to contact us.

Yours faithfully,

Freephone 0800 052 0117
